

THE WORLD OVER

AMBULANCE DRIVER PICKS UP MOTHER IN EDMONTON

When John A. McFarlane drove an ambulance to the scene of an accident in Edmonton Saturday night, he found the fatally-injured victim was his mother. Mrs. Ellen McFarlane suffered a crushed skull when struck by an automobile which skidded on slippery road surface as the driver sought to avoid the 65-year-old woman. The machine carried Mrs. McFarlane over the roadway, crushing her against a tree.

LINDBERGH'S BACK IN AMERICA

NEW YORK—America's "Lone Eagle," Col. Charles A. Lindbergh, came back to his own country Sunday, ending his two-years-of self-imposed exile with a surprise visit to his native land. Unheralded, and the strictest secrecy, Col. Lindbergh and his wife arrived on the S.S. President Harding to break—at least for a brief time—the date of the Revue has been set for December 10th and that a full evening's programme will take place. Besides the Carbon pupils taking part in the entertainment, there will be a number of Drumheller kiddies who will help all to a splendid programme, which will include all types of dancing by clever kiddies. Acrobatic numbers will also be included on the programme. This revue promises to be one of the events of the season and tickets are now being offered for sale by the Carbon pupils.

HIGH TARIFF—PRAIRIE FARMER

The Seattle Index shows that the prices paid by Western producers for the things they buy are some 34 per cent higher than they were before the war, and even at that time it was considered that the costs of these things were higher than they should have been in relationship to the prices received by farmers for the commodities they produced and sold. It is undeniable that much of the extra cost is caused by the high tariffs which protect Canadian industry, and make both foreign and Canadian goods higher in price.

There are still a number of subscribers who are hollering out for their subscription payments. We would like them to call and pay up their arrears if at all possible.

CHIEF—While I was out with some of the boys the other night I bought a few more of those DITTO—did he get anything?

CHIEF—I'll say he did. My wife thought it was me coming home.

DO YOUR CHRISTMAS SHOPPING EARLY

Consult the folder, recently mailed to you, for suggestions. If you are lost, request another when writing for your 1933 calendar.

PERSONAL GREETING CARDS

The best assortment we have ever shown of CHRISTMAS WRAPPING PAPER, SEALS, TAGS, ETC.

Christmas Cards priced from 2 for 5c to \$1.35 each

McKIBBIN'S DRUG STORE

CASSIDY KIDDIES REVUE

TO BE STAGED IN HALL

FRIDAY, DECEMBER 10

Several Drumheller Pupils Will Assist in Evening Program

It was inadvertently stated in our last issue that the Cassidy Kiddies' Revue would be staged in the Farmers' Exchange hall on December 2.

Mrs. Cassidy has informed us that the date of the Revue has been set for December 10th and that a full evening's programme will take place.

Besides the Carbon pupils taking part in the entertainment, there will be a number of Drumheller kiddies who will help all to a splendid programme, which will include all types of dancing by clever kiddies. Acrobatic numbers will also be included on the programme.

This revue promises to be one of the events of the season and tickets are now being offered for sale by the Carbon pupils.

It is gratifying indeed to see the current turned on again in the local light house. Every night for the past two months the town has been without electric light service.

Scarlet fever is going the rounds and school was closed for three days last week while the building was being fumigated.

Curling is going full blast each night and we understand that many enjoyable games are being played. With twelve rinks entered for competition this year there has been considerable interest shown in curling.

RITCHIE BUYS HARDWARE STOCK OF C.W. GRAY STORE

Mr. T. H. Ritchie, principal of the Carbon school, and John Deere agent in Carbon, has purchased the surplus Hardware stock of the C. W. Gray store and we understand that he intends to have this stock moved into his present location of business on front street, where he will sell hardware lines in future.

Mr. Gray who retired from business in Carbon this fall, is at present in Calgary, and was a visitor to Carbon last week. He plans to dispose of the building where he operated his business for a number of years.

There is an excellent sheet of ice at the Carbon skating rink now and many skaters were out Sunday afternoon and enjoyed themselves on the ice surface. While lights were not connected up on Sunday, it is expected that this matter will be attended to early this week, so that hockey practice and skating may be well established for the season.

Stating fees have been set as follows:

School children \$1.00

High school students \$2.00

Adults \$2.50

Family ticket \$5.00

These admission rates are for the season. Single admissions are, children, 15c; Adults, 25c.

VICKS V-ATRO-NOL

Need Is Great

As the eighth year of economic and agricultural depression for a substantial area of the Western Canadian prairie provinces moves towards its close the need for the Federal government to assume full financial, if not administrative, responsibility for relief in all its phases, including medical and hospital costs and administration charges becomes more imperative, and not only in the rural districts but in the urban centres as well.

Under the relief act up to this date in Alberta and Saskatchewan the Federal government has assumed full financial responsibility for direct relief in what is known as the Federal drought area, comprising a substantial area of municipal units and unorganized territories together with the towns and villages situated in these areas. The provincial governments are required along with the municipalities to bear hospital and medical costs in the Federal drought area and in addition the provincial governments must match the Federal money grants in aid, dollar for dollar, as a joint contribution towards direct relief expenditures in rural and urban municipalities outside the drought area.

The Federal contribution to the drought area is an outright gift, not to be repaid and is accompanied by the proviso that neither the whole nor a portion of it may be worked out.

Thus within the Federal drought area the provincial governments and municipalities still have to bear the not inconsiderable cost of medical care and hospitalization and outside the drought area the municipalities, urban and rural, continue to carry a percentage of direct relief expenditures, the costs of medical and hospital care and administration charges.

Relief Means Starving

While it is true that the larger urban centres today are carrying a smaller percentage of direct relief expenditures than at any one time in the past, the accumulated burden of overhead from borrowings to provide for their share of direct relief expenditures in past years has been rapidly mounting during the period when there was no market for their securities and to-day the credit of many of the cities is practically at a standstill. At a time when the full burden cannot be passed on to a decreasing number of solvent taxpayers whose earnings are declining.

Furthermore, it must be remembered that the plight of these cities has been accentuated in recent years by the necessity of taking care of an influx of rural population who have established residence for a sufficient length of time to qualify for relief.

Paced with this situation it is not surprising that the demand from the governing bodies of cities in both Alberta and Saskatchewan to be relieved of this burden is becoming more vigorous and that in Alberta, at least, the cities demands are accompanied by a threat to cut off relief on a date to be named unless further assistance is forthcoming from the senior government. Conference of the mayors of Saskatchewan cities have been called with prospects that a similar situation may be met.

Most Go To Ottawa

If the cities are in no better financial position than that of the provinces, more than mortal mission in their intentions to seek a relief cut-off date and will carry them out it is quite predictable that the provincial governments will have to pay the unwanted bill on the Ottawa doorstep, for the provinces are in no better financial position to carry the burden than the municipalities themselves.

With the end of the financial year in sight for the cities and the provinces the need for direct relief assistance has become more acute, but even greater is the need that assistance take the form of work in place of donations or doles in cash and kind, wherever it may be feasible and to the maximum possible extent to the interest of the recipients and the taxpayers alike, and more particularly also in the form of assistance in the form of relief in the urban centres.

Work Is First Consideration

In this connection it is interesting to note that the Alberta cities made the provision of work one of two alternatives submitted to government authorities when they asked for relief from the load they are carrying, either by providing sufficient government-financed work to reduce the rolls to a minimum or by assuming the entire responsibility for the administration of unemployment relief.

Even if the Federal government should assume responsibility for the administration of unemployment relief the necessity for providing it in the form of work is still just as great as under relief fully financed by the government and administered by the municipality, not only from the viewpoint of the taxpayer but also because of the mental as well as economic benefits to the relief recipient.

Taxpayers are tired of seeing millions spent without any return and a large percentage of relief recipients would infinitely prefer an independent means of support to gifts.

He (chronicler): "That was a beautiful thing the orchestra just played. To me it was like the melody of a first love or the dewy freshness of an early spring day."

She: "You're right. It was a divorce."

The big potatoes get to the top of the heap, but they wouldn't be there if it weren't for the little fellows at the bottom.

How many words can you make from "advertiser"? ask a puzzle creator. Don't know about the words but some people have made millions of dollars out of it.

B.C. Government Program

World Extend Northern Boundaries To The Yukon

Premier Pattullo outlined for the British Columbia legislature a 20-point program of government objectives designed to make the province "a hub of industry and development, with economic and social security from the 49th parallel to the northern boundary, and from the Pacific to the Pacific ocean, with our people happy and prosperous."

Among the 20 objectives enumerated by the premier in his speech winding up the budget debate were:

Maintenance of Empire tariff preferences for the benefit of the province's primary industries and at the same time expansion of the province's business with the United States and other countries.

Establishment of transportation facilities with the Peace River country and northern British Columbia as an access to the North Pole.

Linking of the Pacific Great Eastern Railway—extending now from the head of Howe Sound about 200 miles to Queen's B.C.—with Canada's two national railway systems.

Cooperation with the Dominion to the end that all unemployed and temporarily unemployed able to work may be able to sustain themselves.

Establishment of a central unemployment office to coordinate and temporarily unemployed able to work may be able to sustain themselves.

Others included improvement of the financial position of municipalities, the establishment of a better understanding between employers and employees, improvement of labor conditions and improvement through legislation and administration of "the health conditions of our people."

Premier Pattullo's proposal to extend the boundary of the Yukon to the North Pole would bring about the greater part of two Arctic islands and the great coast of ice within the provincial borders.

Extension of the province's eastern boundary along the 120th meridian to the Pole would bring about two-thirds of Banks Island in the Beaufort sea and about half of Prince Patrick Island into British Columbia.

Many Priceless Volumes

China's Exhibit In Bible Was Extensive In Exhibition

An exhibition of Bibles in Piping this year evidenced China's interest in the Christian Scriptures. There were 200 volumes, representing 200 languages and dialects, of which 17 were Chinese. Among the Bibles were some of a costly character, and some of a more modest kind. The volumes were lent by libraries, universities, individuals and various mission groups. The British and Foreign Bible Society lent the famous Morrison Bible of 1823 and the Bible of 1824, the first printed Chinese version to be published.

No volume, however, attracted as much attention as the Mandarin Bible loaned by Generalissimo Chiang Kai-Shek—the one he used during his imprisonment at the time of the Sun revolt in December, 1926.

Success Of Calgary Boy

Makes A Hit In London In Cutting Capers On Skates

A youthful son of Calgary put the sparkle in London's winter extravaganza "Marina" at the Empress theatre.

He is 25-year-old Eric Wall, whose comic capers on skates brought him praise from critics and applause from the queen. London newspapers credited him with saving the show from being "just like any other ice spectacle."

Wall appeared as a cowboy, an inebriate in evening dress and a beautiful lady of the 19's, and he had left his clothes in the show.

He told reporters afterward he had been about four years in professional skating.

"To my surprise I found that I learned at home for fun went over well in ice skating," he said.

Hubby: "What are we having for dinner?"

Wife: "Spaghetti cake, dear, spangled eggs from Mrs. Jones, the flour from Mrs. Brown, and the milk from Mrs. Smith."

Nineteen thousand silkweavers are needed to make the summer outfit of a Japanese woman.

"Thirity" is the meaning of the name Siberia.

A goose has about 12,000 muscles for killing a stag than for serving a human being in England.

At one time, the penalty was more severe for killing a stag than for killing a human being in England.

A goose has about 12,000 muscles for killing a stag than for serving a human being in England.

A goose has about 12,000 muscles for killing a stag than for serving a human being in England.

FLIN FLON

"The Story of Its Finding and Position Today"

By PRATT RUHN

(Ed. Note: We are indebted to R. F. Tompkins, Toronto, author of "Flin Flon," for some of the material used in the first part of this story.)

There are some things you want to do and seemingly never arrive at the point where they are possible of accomplishment. My visit to Flin Flon was one thing I'd looked forward to for years. Yet, in 1917, while living in Winnipeg from 1914 to 1917, during some years of which I was on the publicity committee of the city, the name Flin Flon intrigued me—coming Flin Flon was where Tom Creighton found this mine—today you wouldn't know the place.

It was in 1917, however, that I was going to be a long story and must go to the Flin Flon mine in the north of the province, at the rate of 7,000 bushels on solid rock in seven years.

The Trail To Flin Flon

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

FLIN FLON

"The Story of Its Finding and Position Today"

By PRATT RUHN

(Ed. Note: We are indebted to R. F. Tompkins, Toronto, author of "Flin Flon," for some of the material used in the first part of this story.)

There are some things you want to do and seemingly never arrive at the point where they are possible of accomplishment. My visit to Flin Flon was one thing I'd looked forward to for years. Yet, in 1917, while living in Winnipeg from 1914 to 1917, during some years of which I was on the publicity committee of the city, the name Flin Flon intrigued me—coming Flin Flon was where Tom Creighton found this mine—today you wouldn't know the place.

It was in 1917, however, that I was going to be a long story and must go to the Flin Flon mine in the north of the province, at the rate of 7,000 bushels on solid rock in seven years.

The Trail To Flin Flon

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

In 1917, I discovered on Hook Island in Winnipeg and on the north side of the city, the Flin Flon River near the mouth of the Winnipeg River.

Not Afraid Of Work

Dr. John Beattie Looks After

World's Finest Anatomical

Collection

Dr. John Beattie, for whom a

handsome new research laboratory is

being built above the headquarters

of the Royal College of Surgeons in

Lincoln's Inn Fields, London, has

charge of the world's finest anatomical

collection. It contains over 30,000

specimens. He is a Belfast man,

with tremendous capacity for sustained

work, and he is often gone for

weeks at a time with only three or

four hours' sleep a night, says the

New York Times. He is himself a

doctor, and they have two young

children. At present he is engaged

in important work on the function of

brain cells.
